UCPath: Changing the Way We Work

- Business transformation
- Efficiency
- Productivity
- Shared services

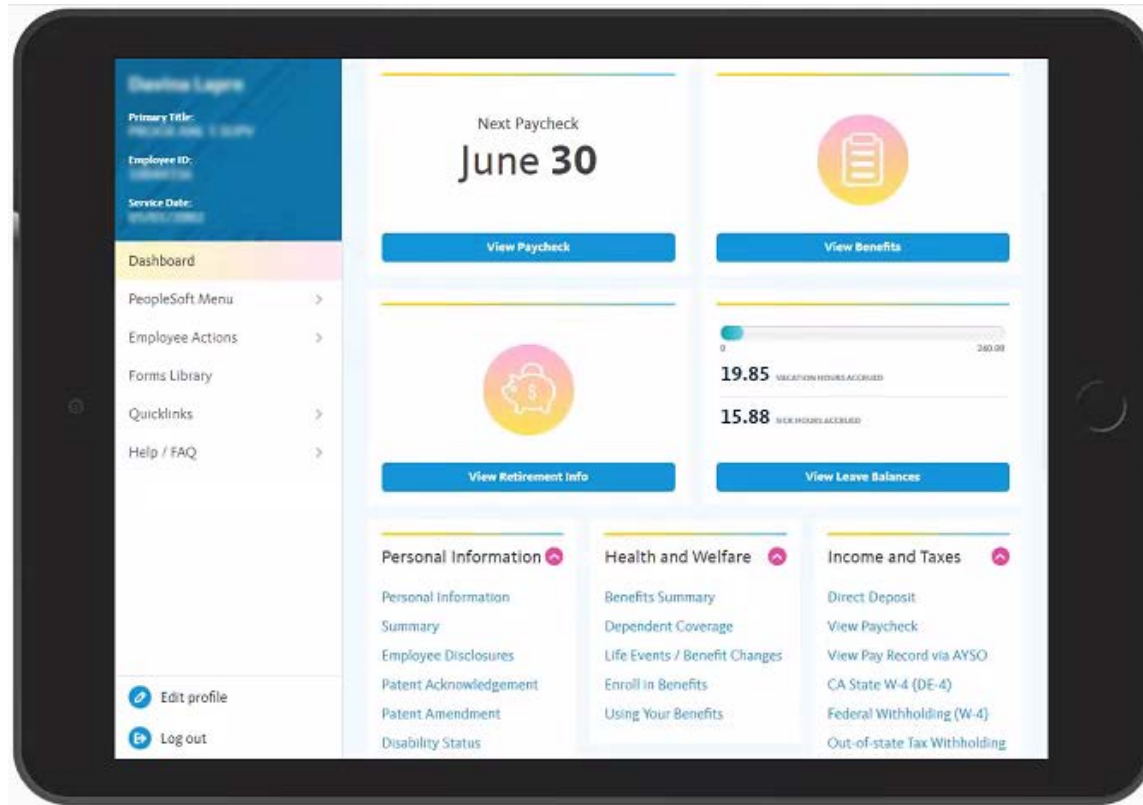

UCPath: Paving the Way for Future Growth

- Utilizing technology to streamline transactions
- Providing system-wide HR information and analytics
- Freeing up time to let units focus on the core mission

UCPath: Putting More Options in Employees' Hands

Employee Self-Service:

A new way to manage your payroll, benefits and employee information.

Risks

- 11 different versions of an outdated payroll system
- Existing systems require manual calculations and processes, which can result in avoidable errors and rework.
- Existing technologies are insufficient for UC's complex employee population and changing business needs.
- Existing systems are nearly 40 years old!

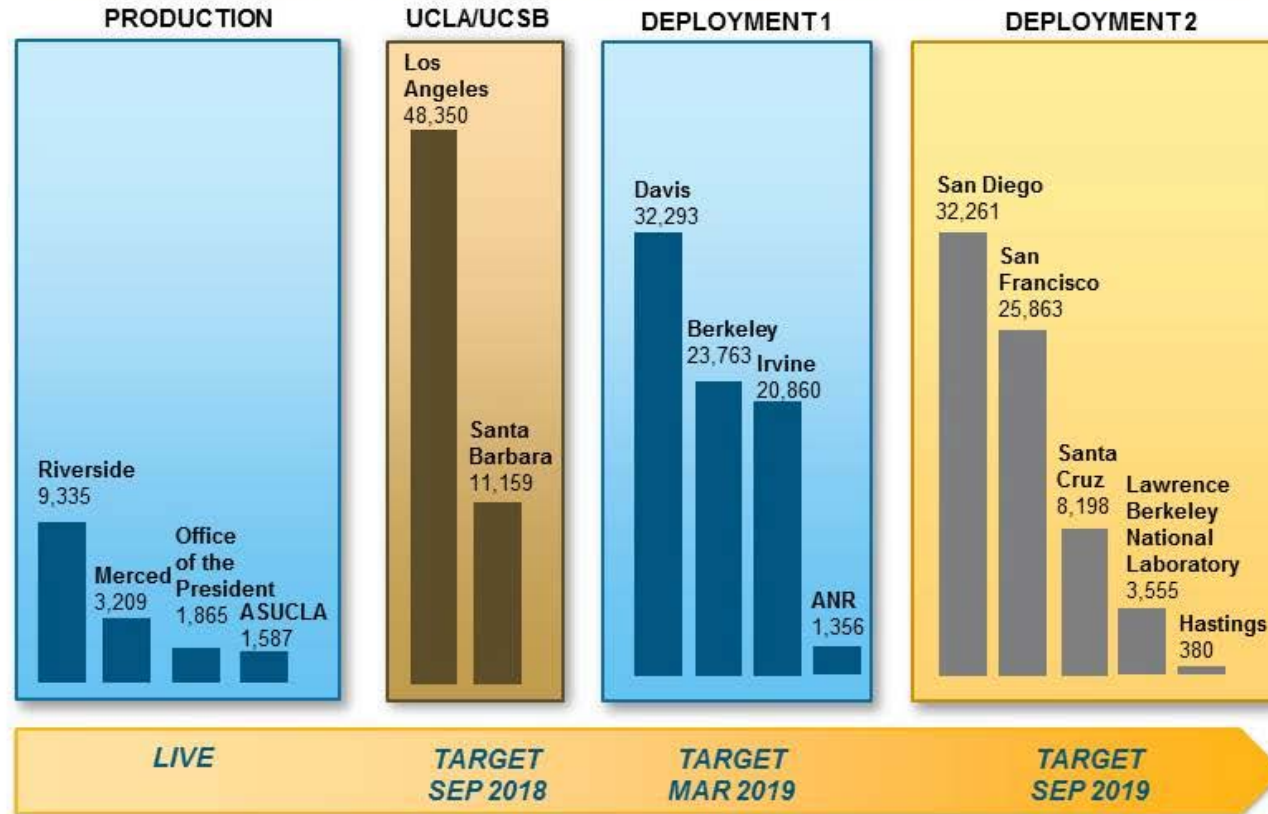

At-a-Glance

UCPath will support more than **220,000 UC employees** across **10 campuses, 5 health systems** and **5 locations** (Agriculture and Natural Resources, ASUCLA, Hastings College of Law, Lawrence Berkeley National Lab, and UC Office of the President).

Experts from throughout the UC System have worked together to standardize more than **100 system-wide processes.**

UCPath Deployment Sequence

All UC employees will be transitioned to UCPath

Preparing for UCPATH

- Update department data prior to UCPATH deployment
- Follow UCPATH [news and updates](#)
- Participate in training
- Spread the word!

A Message From Our Project Sponsors

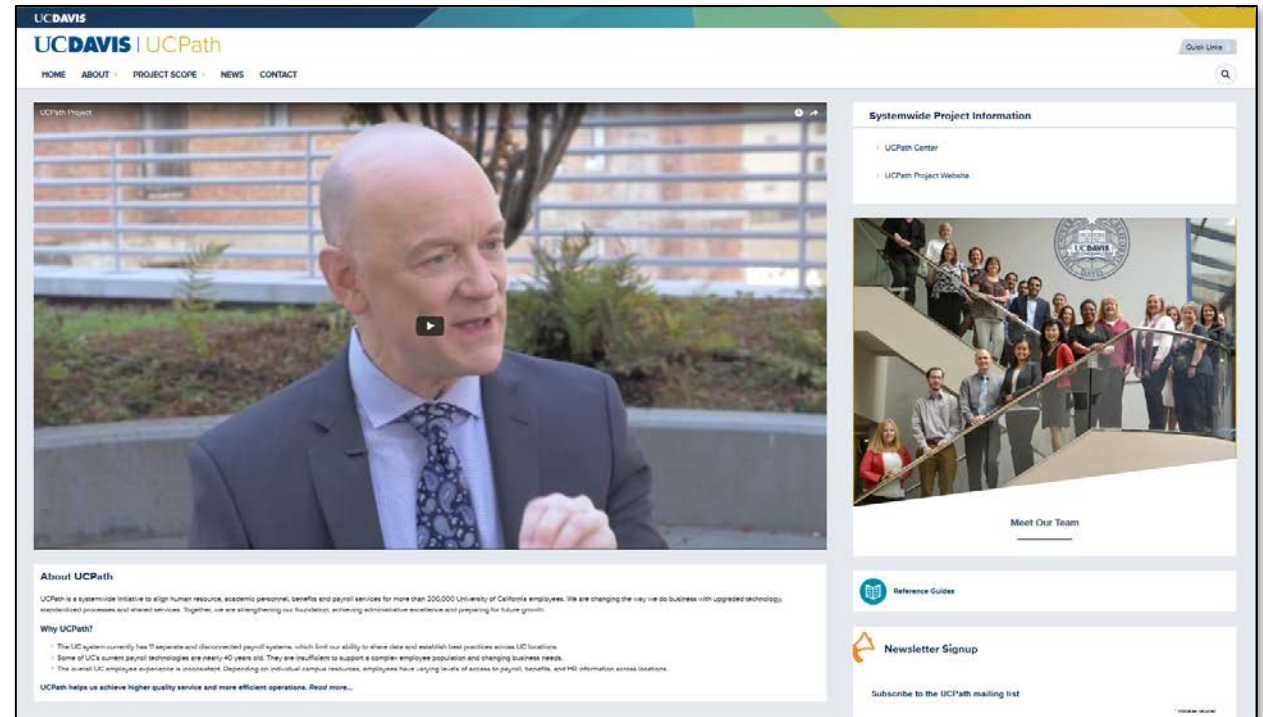

From left: [Tim Maurice](#), [Steven Roth](#), [Mike Allred](#), and [Julie Fritz-Rubert](#).

Not shown: [Brenda Rebman](#), [Sara Reed](#), and [Rinnie Singh](#).

We are pleased to report that UC Davis, UC Davis Health, and Agriculture and Natural Resources are on track for UCPATH deployment by July 2018. This would not be possible without the collaboration among the Office of the President, our partner campuses, the project team and subject matter experts throughout the organization.

Information and Resources

- Email: ucpath@ucdavis.edu
- Website: ucpath.ucdavis.edu
- Training schedule and resources to be posted on the UCPath website approximately four months before go-live
